Mindful Safari

Everyone spends a lot of time indoors during the day. This activity allows children to get outside and move and refresh the mind.

Tip: if you are able to go outside into a garden or onto a veranda and you're in the sun, wear a hat and sunscreen while exploring outside! Young children will need a parent to guide them while older children may do this independently.

Explain that you are going to go on an exciting Safari adventure to look for animals that jump, fly, crawl. To look for plants and objects that may be big or small and to listen for different sounds.

1. Slowly breathe in through your nose and count 1, 2, 3 in your head.
2. Hold the breath for 1, 2, 3.
3. Slowly breathe out through your mouth and count 1, 2, 3 in your head.
4. Now, make sure to move slowly and stay quiet and calm so you don't scare away the animals.
5. Engage your super-senses of sight, smell, hearing and touch while you walk around.
6. Focus on something such as a plant, animal or object you can see.
 - a. What does it look like?
 - b. Is it small or big?
 - c. What colour is it?
 - d. Does it smell? What does it smell like?
 - e. Can you safely touch it? What does it feel like?
 - f. Does it move? How does it move?
 - g. Have you seen this before?
7. Write or draw all the things you find! Show someone else in your classroom or home of all of the things that you have discovered – you could even write a story about it to read to them later.

Alternative Step 6: Rainbow Walk

Instead of focusing on an object, plant or animal, take a walk, and look for something red, orange, yellow, green, blue, and purple. Keep going through the colours, in order, until the end of your walk.
